

Herb Lingl

***California Wildfires:
Aerial Perspectives***

The October 2017 North Bay firestorm (including the Atlas, Highway 37, Nuns, Sulfur and Tubbs fires) prompted Herb to begin a project systematically documenting the increasingly devastating aftermath of California wildfires from the air.

Herb has not been photographing the fires from the air while they are occurring, but documents the aftermath of those fires on days where visibility is outstanding, and snow, the changing colors of leaves or unusual lighting conditions may contribute to the aerial photography.

Herb has documented the aftermath of the following fires as part of this project:

Atlas Fire
Camp Fire
Geysers Fire
Highway 37 Fire
Mendocino Complex Fire
Nuns Fire
Sulfur Fire
Thomas Fire
Tubbs Fire
Valley Fire
Woolsey Fire

Some of this work is available for review, prints and licensing at:
